Bomgar Overview

Installation

Visit: https://remotehelp.uwaterloo.ca/login and present your UWdir/ADS credentials. In the My Account section there is a link to download the representative client.

Under the **Bomgar Representative Console** select the appropriate platform and select **Download Representative Console**.

Bomgar Representative Console Launch Bomgar Web Rep Console Desktop Representative Console Choose Platform Windows® (x64) Download Representative Console Follow these steps for the initial login to the Bomgar Representative Console: 1. Download and run the Representative Console software. 2. Follow the installation wizard to install the software. 3. When the installation is complete, run the Representative Console and enter your Username and Password at the login prompt.

Figure 1. There are multiple platforms available for Windows, Mac, and Linux

Concurrent Licenses

We currently have 8 concurrent licenses, and you use a license when you are logged into the representative software. Please log out when you are not actively using the software.

One login at a time

Our server is set up to only allow one login at a time. If you start a second session, you will end your first session. The people you are helping will be moved to the second session.

Bomgar Overview

Configuration

These settings save a couple steps when you are starting a session. Under **File > Settings**:

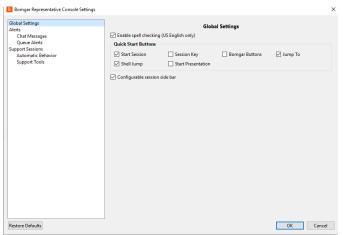

Figure 1. Bomgar's settings window

Automatically request screen sharing

This saves a step at the beginning of every session. Select **Automatic Behaviour**, check **Automatically request screen sharing**, and select **OK**.

Prompt when new customer...

With this on, you will get a pop-up and simply click **Yes** to start a session, rather than having to select it from your personal queue. Select **Queue Alerts**, check **Prompt when new customer enters personal queue**, and select **OK**.

Show session key

This gives a button on the main interface that generates a session key in one step. Select **Global Settings**, check **Session Key**, and select **OK**.

Main Functions
